Spring Plungers · with moveable ball and internal hexagon
## 22031.0245

Product Description

Spring plungers can be used for locating or for applying pressure, as a detent or for ejection.
The running of the ball minimises wear on the counterpart, this also results in a positive locking behaviour depending on the counterpart.
Another advantage of the plastic ball is the electric insulation.

Material

Body
• Stainless steel 1.4305

Bearing
• plastic

Ball
• Stainless steel, hardened

Spring
• Stainless steel

Characteristic

Heavy spring load: marked with two lines
Standard spring load   Heavy spring load

More information

Notes

Special types on request.
Spring plungers are specially tested for spring range and forces.
